NōGo® Needleless Injection Port Cover

Identifies that an infusion therapy line should not be used.

- **Improve communication and situational awareness** for staff, patient and patient's family and support system.
- Identifies to healthcare workers when an infusion **therapy line should not be used.**
- **Blocks access** to the needleless injection port(s).
- **May help decrease the risk of medication incompatibility errors** or other situations when an infusion therapy line is not to be used.
- Intentionally designed to be a **simple, intuitive, "No Tech" solution** needing no alarms or computer interface.

The Sāfen® Solution

SĀFEN AWARDED THE 2023
"Weezie's Angel Healthcare Hero Award"
and "J. Pat O'Connell Technology
and Innovation Award"

PATIENT SAFETY FOUNDATION

NōGo® Needleless Injection Port Cover:

- **Distinctive shape and color** designed to block access to the needleless injection port(s.) Does not come into contact with the injection port plunger – reducing the risk of port site contamination.
- Icon provides a **visual reminder** of the line NOT to use.
- Icon is raised, allowing the use **touch/texture (haptics)** through gloved hands.

For Use in Multiple Patient Care Locations:

- Hospital (Emergency Department, Intensive Care Units, Medical-Surgical, Specialty Care Units, Operating Room)
- Prehospital
- Interfacility Transports
- Outpatient
- Home Health
